Araldite[®] CW 5715 US Aradur[®] HY 5716 US System

HIGH TEMPERATURE FILLED EPOXY ENCAPSULATION SYSTEM

GENERAL :

Araldite[®] CW 5715 US with Aradur[®] HY 5716 US System is a filled, high temperature encapsulation system whose toughened characteristics results in superior anti-crack propagation.

BENEFITS :

- x Superior anti-crack propagation
 - x Exceptional thermal shock resistance
 - x Very good impregnation capability
 - x Low-abrasive fillers
 - x Excellent high temperature endurance
 - x Good thermal endurance
 - x Good dielectric properties
-

APPLICATIONS :

- x Construction of jigs, nesting and holding fixtures
- x Fillets for metal patterns
- x Potting
- x Drill bushings
- x General repair of tools, dies, jigs, fixtures, models, and prototypes
- x Patching of cr7m,.6(ce TT7 1 Tf c Tw an)-1.5(gs31 Tf 3.5106aJ /TT7 1 Tf -0.462 06 Tc Tw 1 Tf kT6 1 s)-6pipe
